CHAPTER 518
J O I N U S

The Golden State Manufactured-Home Owners League (GSMOL) is a non-profit organization formed almost 60 years ago to protect the home values and quality of life of Mobile Home owners. In addition to working with the State of California and local legislatures, GSMOL works daily at the State level lobbying for legislation that will benefit Mobile Home owners. Through our Emergency Legal Fund (ELF), GSMOL pursues violations of the Mobilehome Residency Law (MRL798…) which protects Mobile Home owners.

To help GSMOL continue to provide these and other services,

we invite you to join today.

VIEU NEWS

BY PETER CLEAVELAND

About Those Signs

Ever wonder about the OK/NEED HELP signs that we remind you about every year when it's time for our annual ShakeOut drill? Sure, we ask you to put them in your front window to show your participation in the drill, but that's just their subsidiary purpose. The real reason you have a sign is that when a real earthquake happens you can let your Block Captain know if you're all right. Putting out the OK sign saves the Block Captain from having to knock on your door to see how you are. And if you need help and are able to put out your sign that will mean you get help faster.

But do you have a sign, and know where it is? If not, you can pick one up in the Center, on the shelf by the office window (next to the VIEU mailbox and Earthquake Brochures).

Are your MREs expired?

We've been saying for years that MREs (civilian versions of the Military's Meals Ready to Eat) are a good addition to your earthquake kit. But we've noticed that our supply is well past its expiration date, and even though the contents are generally safe to eat well past then (unless it has been stored at high temperatures), there is a limit.

How can you tell if your MREs are no longer good? The easiest way is to try one. If the packet is swollen, or has a bad smell when opened, of course it should be thrown out. If not, give it a careful taste test. But even though it may seem OK, it would be a good idea to look into replacement. We checked, and the best prices still seem to be from https://theepicenter.com. Just to check, we opened some of the MREs in our kit. So far the smoked almonds are OK; we'll let you know next month about the rest.

園區內志願者應急組織（VIEU）信息

關於那些標誌

您是否想知道我們每年在進行年度 ShakeOut（大震動）演習時都會提醒您把 OK/NEED HELP（可以/ 需要幫助)標誌放在前窗上? 當然，這顯示您參與演習，但這只是次要目的。放標誌的真正原因是當真正的地震發生時，你可以讓你的街區隊長知道你是否還好。 放出「OK」(可以)標誌可以讓街區隊長不必敲你的門來了解你的情況。 如果您需要幫助並且能舉出 「NEED HELP」(需要幫助)標語，這將意味著您可以更快地獲得幫助。

你有沒有一個標誌並且知道它在哪裡嗎？ 如果沒有，您可以在會所中心辦公室窗口的架子上(在VIEU 郵箱和地震手冊旁邊）領取一份。

您的 MRE（打開即食食品）過期了嗎？

多年來我們一直在說，MRE（軍用即食食品的民用版本）是地震工具包的一個很好補充物。 但如果我們注意到，我們的補給已經遠遠超過了保質期，儘管過期後的內容物通常可以安全食用（除非它已在高溫下儲存)，但還是有一個限制的。

如何判斷您的 MRE 是否仍然良好？ 最簡單的方法就是試試看。 如果包裝鼓脹，或打開後有異味，當然應該丟掉。如果不是，請仔細品嚐。但即使看起來不錯，考慮更換也是個好主意。我們查了一下，最優惠的價格似乎還是來自 https://theepicenter.com

我們打開了套件中的一些 MRE 來檢查。 到目前為止，煙燻杏仁還可以； 我們將在下個月告訴您其餘的嘗味。

Men and Women's Club News

The Men and Women's Club is hosting a potluck dinner on Saturday, April 13. Sign- up sheets will be posted in the club house main hall. Watch your mailboxes for a flyer with details about this event. We are also thinking of a casino trip to Cache Creek, and/or an outing to see a play at the San Leandro Players Theatre Company or the Castro Valley Chanticleers Theatre in future months. Interest sign-up sheets will be posted in the club house main hall soon.

If there are enough people interested in any of these outings then we will proceed with planning the events. We are also planning a few summer activities, including an ice cream social in June and the annual BBQ Picnic in July.

A big thanks to everyone who helped make the Pancake Breakfast a huge success! And thanks to everyone in the community who came out and enjoyed a delicious meal! It was a fun morning!

Upcoming Events

- **4/13** | Potluck Dinner
- **June** | Ice Cream Social
- **July** | BBQ Picnic
- **tbd** | San Leandro Players Theatre Company
- **tbd** | Castro Valley Chanticleers Theatre
- **tbd** | Cache Creek Casino Trip

Mission Bay Residents Association (MBRA)

THE RENT STABILIZATON ORDINANCE (RSO) MUST BE CHANGED!

In July 2019, a Rent Stabilization Ordinance (RSO) was passed into law by the San Leandro City Council. This ordinance was intended and written specifically for manufactured and mobile homes. It was designed to keep homes in manufactured and mobile home parks as affordable housing.

Within two years, it became obvious that the ordinance was not attaining the objectives that it was intended for. The annual rent increases that the City would allow Park owners were still too high to keep mobile/manufactured homes affordable. The City still allowed Park owners to tell their tenants (us) that they would have to pay part of any capital replacements. For example, a Park owner would still be allowed to tell their tenants that they (the tenants) would have to pay for part of the repairs to a concrete wall. When a house was being sold in the Parks, the landlord would be allowed to increase the new rent on that house more than the annual rent increase. This makes the sale of a house more difficult because of the higher rent.

In the past two years, the MBRA has been notifying the City Community Development Department and the City Council about these ongoing problems in the RSO. We have urged them to correct these problems. The Community Development Dept has vowed to address these problems and would try to assign more staff to work on it. The City Council has publicly voted to make the re-write of the RSO a high priority. To date, the changes have not been made.

The MBRA is still working on this issue. We have requested more City staff to work on this and have forwarded the following changes that we are asking them to make:

Our primary requirements:

- Reduce the annual cap from 1) the lesser of regional CPI or 4%, or 2) the lesser of 60% of regional CPI or 3%.
- Eliminate all landlord-to-tenant expense and capital replacement passthroughs.
- Cap rental increases upon sale of home and lease to a new tenant.
- Funds to enforce the Ordinance, including enforceable, financial impacts for noncompliant park owners.

We're not stopping, Neighbors! We're working for you!

For more information, please email us at **MBHOASL@Gmail.com**.

Plastics in Our Food?

CR's tests found plenty. How to reduce your exposure.

SUBSTANCES KNOWN AS plasticizers are routinely used to make plastic more flexible and durable. And plasticizers (those known as phthalates and their substitutes are the most common types) and bisphenols (other chemicals in plastic, such as BPA) are widespread in our foods, according to recent CR tests of 85 grocery store foods and fast foods, all packaged in cans, pouches, foil, or other material.

That's concerning because there's increasing evidence that these chemicals can threaten our health. For instance, growing research shows that they can interfere with the production and regulation of estrogen and other hormones. This, in turn, can contribute to an increased risk of health problems such as diabetes, obesity, cardiovascular disease, and certain cancers.

CR experts want the government to get plasticizers out of our food. But until that happens, these steps can help reduce your overall exposure to chemicals found in plastic.

- Use glass or steel water bottles, and store food in glass or steel containers instead of plastic. If you use plastic containers, don't store hot food in them or use them to heat food in the microwave.
- Avoid fast foods. In our testing we found some of the highest levels of phthalates and their substitutes in fast food.
- Eat fresh, minimally processed food, including plenty of unpackaged fruits and vegetables.
- Use wood, stainless steel, or silicone kitchen tools instead of plastic.

For our full report on plastics in food and to sign a petition asking the Food and Drug Administration to take the appropriate action, go to **CR.org/foodplastic.**

Health Wire

Water Workout Benefits

High-intensity interval training (where you speed up for short bursts, then slow down) in a pool was as effective as "land-based" HIIT, according to an analysis of 18 studies. (Water exercises included pool walking, aerobics, cycling, and strength training.) Water takes the pressure off joints, so it can be helpful for people with arthritis.

Source: BMJ Open Sport & Exercise Medicine, Nov. 14, 2023.

TRY THIS FOR PAIN RELIEF

People with chronic pain often miss out on drug-free treatments for relief, a survey of 7,422 older adults found. While those ages 65 and up might go to physical therapy for pain, they're less apt to use effective therapies like exercise (including yoga), talk therapy, meditation, and massage. If you often have pain, ask your doctor which might be best for you.

Source: Annals of Internal Medicine, Nov. 14, 2023.

LOWER BLOOD PRESSURE FAST

A study found that seven days of very low consumption of salt reduced systolic blood pressure (the top number) by 6 points, comparable to the effects of some meds. Participants got a week of meals and snacks containing 500 milligrams of sodium per day, far less than the American Heart Association's recommended limit of 2,300 daily mg.

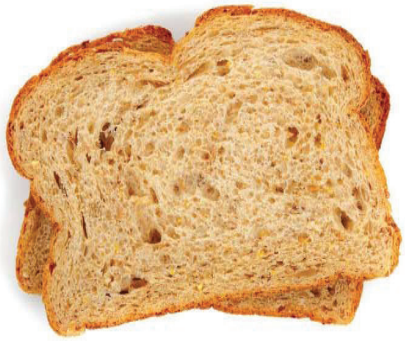

Source: Journal of the American Medical Association, Nov. 11, 2023.

Another Reason to Get More Sleep

Skimping on sleep by 1½ hours a night hiked insulin resistance (trouble absorbing blood sugar) by more than 20 percent in older women, a Columbia University study found. Getting less than 7 to 9 hours of shut-eye a night may, over time, contribute to a higher risk of diabetes.

Source: Diabetes Care, Nov. 13, 2023.

Your Brain Loves Whole Grains

Older adults who ate three daily servings of whole grains—like whole-wheat bread, oatmeal, quinoa—and popcorn had slower declines in thinking and memory compared with those who ate one serving or less, according to a study. (The participants were African American.) Whole grains may reduce inflammation and keep the immune system healthy.

Source: Neurology, Nov. 22, 2023.

A Positive Attitude May Increase Longevity

Less than 10 percent of the participants in a study who had the most optimistic views about growing older died over nine years, while the most pessimistic faced a 45 percent risk of death. At the study's start, 5,483 adults were surveyed about their health, lifestyle, and perspectives on aging. Researchers then tracked their longevity. New activities, those that give a sense of purpose, and being social can improve your outlook on aging, the American Heart Association says.

How to Create a Hummingbird-Friendly Yard

from Audobon.org

A little water, a few flowers, and a few perches will bring these tiny dynamos to visit.

You can attract, feed and nourish hummingbirds in your backyard with a few easy steps. Flowers, perches, insects, and water are the key ingredients to a healthy yard that will attract these amazing jewels.

Hummingbirds are specialized for nectar-eating, evident by long bills and grooved tongues ideal for probing flowers. Sugary nectar supplies fast energy and makes up 90 percent of a hummingbird's diet. Unfortunately, due to development and climate change, hummingbird-friendly habitat may be changing across many hummingbird migration routes. You can create a healthy environment for hummingbirds with these steps:

Fill your yard with native flowering plants, vines, shrubs, and trees. To create a customized list of bird-friendly native plants for your area and get connected to local native plant resources, check out our native plants database. Even one plant in a window box or hanging basket can help.

Grow native plants like trumpet honeysuckle, bee balm, and hummingbird sage, which provide much more nectar than hybrids and exotics.

1. Plant native red or orange tubular flowers to attract hummingbirds, in addition to native plants rich in nectar.
2. Group similar plants together and choose species with different blooming periods so that there will be a steady supply of flowers nearly year round.
3. Leave some sticks and small branches on bushes and trees to enable ready perches for hummingbirds.
4.Minimize or eliminate the use of pesticides in your yard.

Perches

Make sure you have plenty of safe places for hummingbirds to rest and sleep in your yard. Hummingbirds often perch to rest or survey their territory; some spots should be in the open and obvious for territorial birds, while others should be in protected areas, hidden from view and buffered from any cooler overnight temperatures.

Insects

Hummingbirds need protein from pollen and insects to maintain their bodies and grow new feathers. Like swifts, hummingbirds are specialized aerial hunters and can snatch small insects from the air. Hummingbirds also glean insects from leaves and from spider webs. To maintain a healthy ecosystem in your yard: Eliminate pesticides. Spiders and insects (arthropods) are an important part of an adult bird's diet, and young hummingbirds still in the nest are almost exclusively fed arthropods.

Water

Provide your yard with a constant source of water from a drip fountain attachment or a fine misting device. A misting device is an especially attractive water source for hummingbirds.

Nectar Feeders (or, Hummingbird Feeders)

Backyard hummingbird feeders provide hummingbirds with nectar critical to their survival, especially during fall and spring migration. Follow these steps to ensure your yard is a safe and nutritious stopover for hummingbirds:

Hang several feeders far enough apart that the hummingbirds cannot see one another; this will prevent one bird from dominating the rest.

Fill the feeders with sugar water, made by combining four parts hot water to one part white sugar, boiled for one to two minutes. (Click here for full recipe.) **Never use honey, artificial sweeteners, or red dye.**

Hang your feeders in the shade to prevent the sugar solution from fermenting.

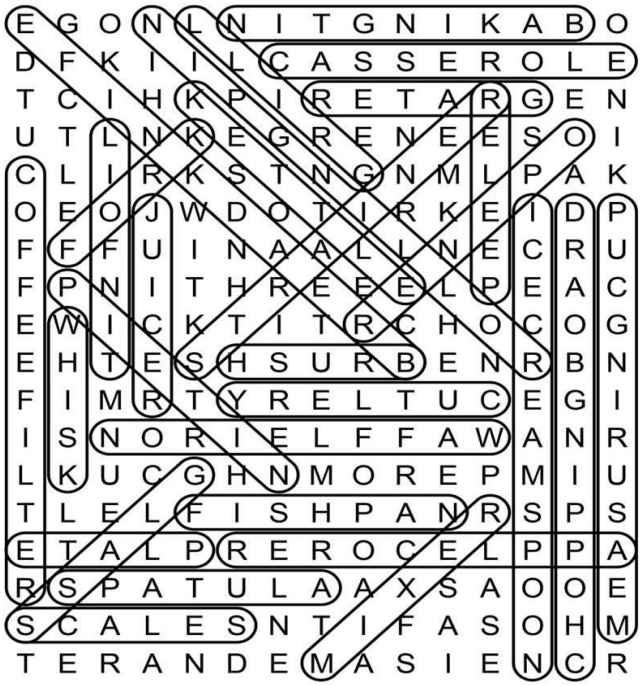

1. Be sure to change the sugar water regularly -- about twice a week to keep away mold.
2. Clean the feeders with a solution of one part white vinegar to four parts water about once a week. If your feeder has become dirty, try adding some grains of dry rice to the vinegar solution and shake vigorously. The grains act as a good abrasive.
3. Rinse your feeder well with warm water three times before refilling with sugar solution.

Check eBird to find out when the first hummingbird sightings occur each spring, and hang your feeders up a couple of weeks before that. In the fall, keep your feeders up for two weeks after you see the last bird using it.

When you're looking for a hummingbird feeder, one of the best features is something easy to take apart and clean, because you'll be doing it often," says Emma Greig, director of Project FeederWatch at the Cornell Lab of Ornithology. Feeders can develop mold that has to be cleaned out as mold can cause a hummingbird to get sick or die and that's why it's important to find a feeder that can be taken apart.

In general, saucer hummingbird feeders will be easier to clean, and having a bottle brush can get into all the nooks and crannies of most shape feeder.
